## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments in light of the amendment filed 12/17/07, with respect to the prior art rejection have been fully considered and are persuasive. The prior art rejection has been withdrawn.

### ***Election/Restrictions***

2. Newly submitted claim 21 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: synchronization and queue embodiments are of a different vein as parameter optimization via modes as originally presented.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 21 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1, 3, 4, 11-14 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Per claims 1, 4, 11 and 13, the term "substantially" in the aforementioned claims is a relative term which renders the claim indefinite. The term "substantially" is not

defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

The terms "as soon as possible" in the aforementioned claims is a relative term which renders the claim indefinite. The term "as soon as possible" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. "As soon as possible" implies further events occurring after the additional data words are received. Examiner suggests including what possible events can occur after the additional data words are received or if there aren't any events, removing the terms and replacing with a word synonymous with 'immediately'.

6. Per claims 3, 12, 14 and 20 are rejected as being dependent upon a rejected base claim.

### ***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 2184

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
